Attachments: HASPOC memo TXR0057247_cpfos methyl.pdf

Flag: Follow up

Anna might have a better understanding of this one than me, but the following wording from the HASPOC memo may be the most helpful:

Ex. 5 Deliberative Process (DP)

Not sure if this helps. If you want me to track down any additional information, just let me know.

Thanks,
Monique

Can I get the back story on this one? Do you agree that we need the cca for this and cannot bridge? I think I am forgetting the history on this one.

Just FYI. We're going to haspoc and recommending that a CCA study be required. Personally I think we could use the CPF data either directly, or as an estimate of relative sensitivity of young to adults. But based on the conclusions of the OP tox team and past haspoc's, we're just asking for the data. I talked briefly with Kelly S., and this will likely change PRD's position on moving forward with this one any time soon.
